WOLVERINE TUBE (CANADA) INC. ANNOUNCES NAME CHANGE TO GREAT LAKES COPPER INC.

London, Ontario based Wolverine Tube (Canada) Inc. announced on Friday March 26, 2010, at the CMX trade show in Toronto, that after 52 years it now has a new company name "**GREAT LAKES COPPER INC.**"

In July of 2008, the London based plant of Wolverine Tube Inc. was sold to a group of Canadian private investors, which includes members of the London management team. The company has since invested in new equipment, new products and acquisitions to offer customers a broader range of products and better service.

"Given our greater penetration in the US market, we felt that a name change would help differentiate our business from that of our former owner. The CMX show, the largest of its kind in Canada, offered the perfect platform for the announcement," said President Don Wellington. "We are proud of our Company and of our new name"

GREAT LAKES COPPER INC. was chosen from one of over 150 names submitted through an internal contest held with the employees of the London plant.

About GREAT LAKES COPPER INC.

GREAT LAKES COPPER INC. is Canada's leading manufacturer of copper tube products for the industrial, wholesale and refrigeration markets. The company has been in operation for over 50 years and based in London, Ontario. The company is Canadian owned and now offers a broader range of products through the Kamco division acquired in November of 2008. With copper tubing, coated copper tube and now line-sets for the air conditioning industry, Great Lakes Copper Inc. can better service its current and growing customer base with a full line of Canadian made products.
